

FEGO Biotech - Nutraceuticals

FEGO Biotech Pte Ltd (2016) is an immuno-therapy company addressing viral infections, skin problems, chronic ailments, auto-immune disorders and early cancer diseases

NUTRACEUTICALS

2018 Health supplements

- * G'NEST capsules

2020 Health supplements

- * G'NEST Pristine upgraded in sachets

PHARMACEUTICALS

2019 Biosimilar drugs pipeline

- * Late 2020 Pre-clinical Biosimilar #1
- * 2021 Pre-clinical Biosimilar # 2

Centre Of Excellence For Immuno Therapy And Immuno Care

Agenda – 1 of 2 @ G'NEST

1. FEGO's opportunity

- Why is this opportunity different from others?
 - a. We create values in physical scientific assets, we do not borrow values and we are not brokers nor traders.
 - b. Unique hybrid of innovative nutraceuticals and constructive bio-pharmaceuticals

2. FEGO's purpose of existence

- a. Enhancing global impact on humanity via immuno-biomedicine
- b. Singapore branding and government wish list
- c. Platform for bio-entrepreneurs: Sustainability, scalability and practicality.

3. **G'NEST as a health necessity for the discerning consumer.** The manifestation of a proven biotechnology for calibrated immuno-health outcomes.

4. **RNA test as a real time companion diagnostic, a much-needed disease alarm clock.**

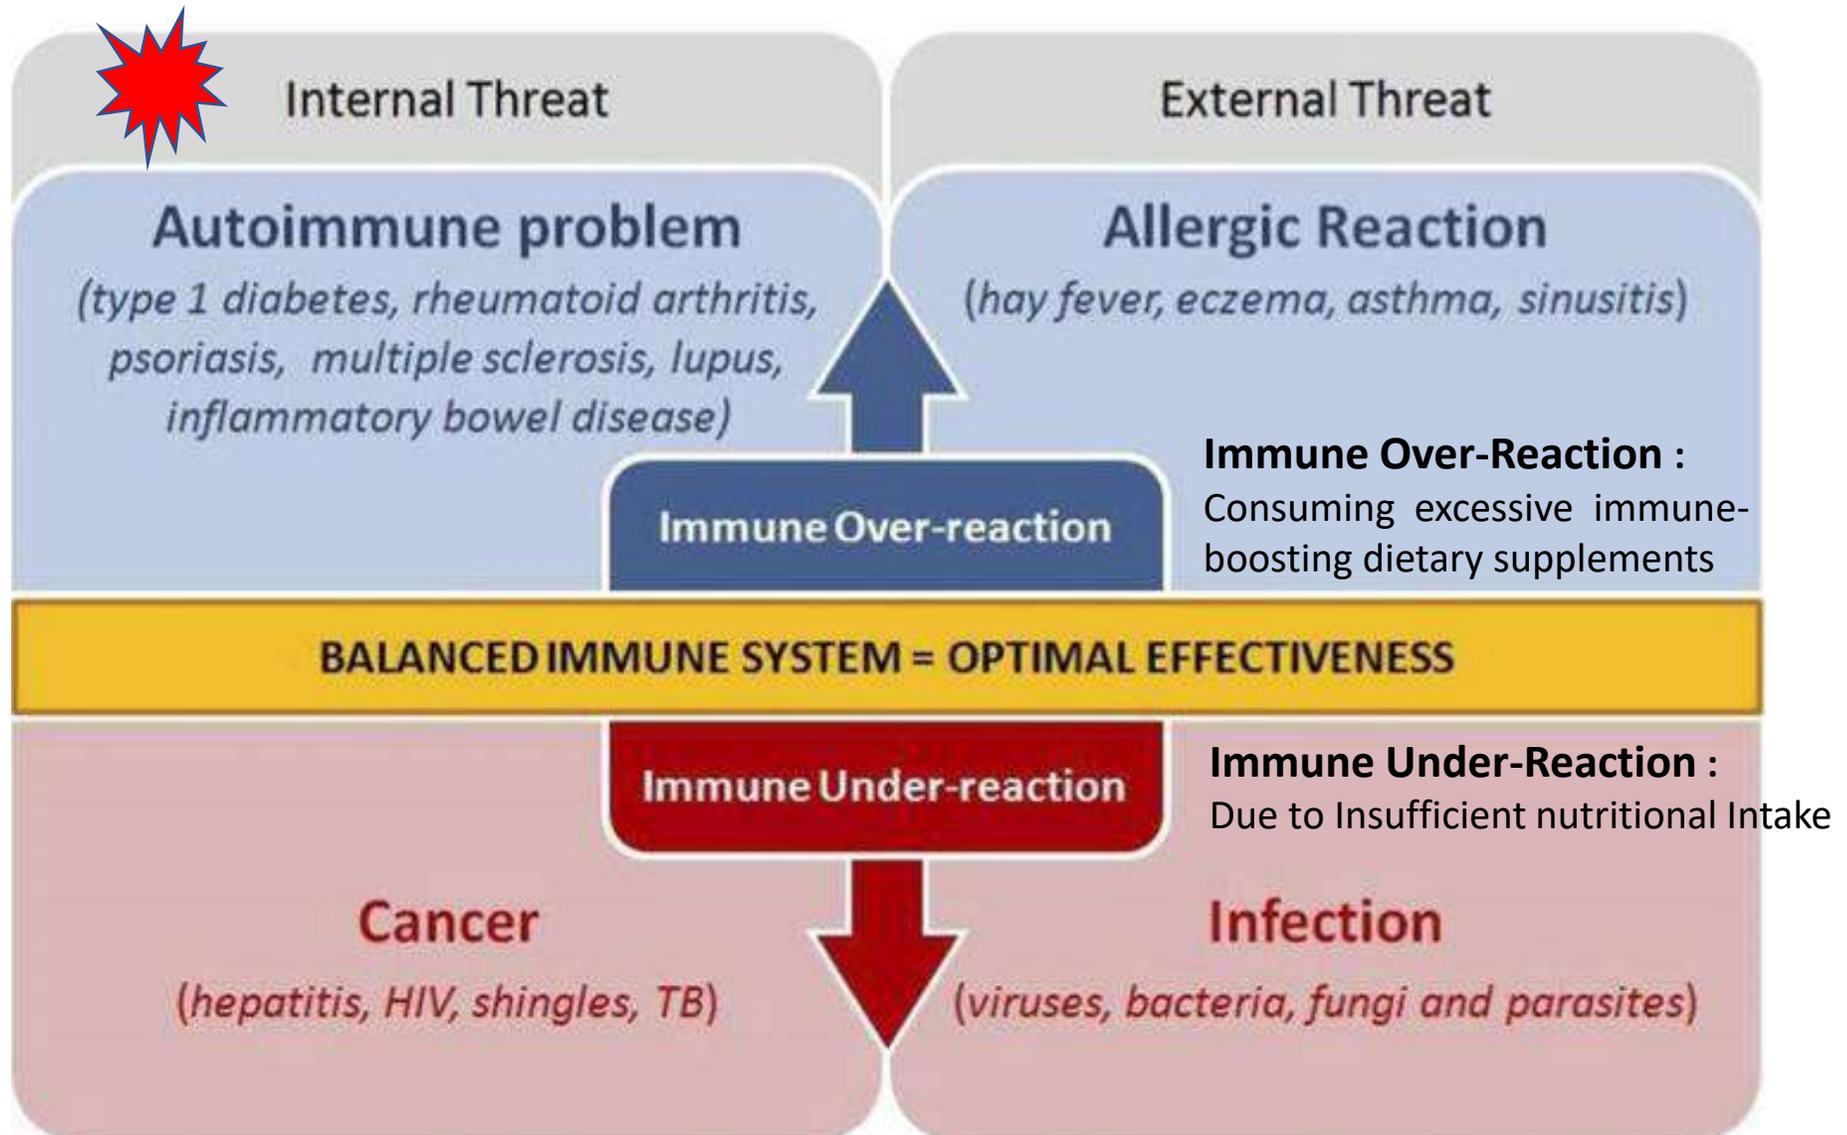

Agenda – 2 of 2 @ G'NEST

5. **G'NEST Club Membership:** An exclusive club for curated and personalized immuno-medicine.

6. **Affiliate Partner opportunity:** Sharing economy for bio-entrepreneurs to be bosses of their own without worries on back-end business costs and yet attaining high gratification rewards and profit sharing bonus, unmatched by any standard principal or source company. A revolutionary symbiotic relationship between principal and "pollinators" or marketing agencies/partners. Many e-commerce companies or Loyalty/Rewards Program companies use this but we are still different from these companies.

7. **Fertilisation between capital markets and raw technological unicorns:** Proven reference models in Google, Grab, Facebook, Alibaba, Instagram etc. But none in the biomedical space, FEGO Biotech strives to be one such unicorns in the niche biomedical space.

YOU ARE CORDIALLY INVITED
我們誠邀您蒞臨

11.04.2018

2018年4月11日

WEDNESDAY 2:30 PM - 5:30 PM
星期三 下午2時30分 至 5時30分

EXPLORATION THEATRETTE @ LEVEL 4
Matrix @ Biopolis
30 Biopolis Street, Singapore 138671

LAUNCH OF G'NEST 精燕閣 发布会

Forum: The importance of a *balanced* immunity system
座谈会: 平衡免疫系统的重要性

Learn about how a healthy immune system could prevent viral infections, skin conditions and cancer.
了解健康的免疫系统如何能预防病毒感染, 皮肤病和癌症。

Keynote Speaker: 主讲人:
Panelists: 圆桌讨论嘉宾:

 Dr. Lim Kah Hong CEO of FEGO Biotech	 Dr. Yee Chee Joo FACD of Singapore Institute of Health Sciences	 Dr. Yee Han Kim FACD of Singapore Institute of Health Sciences	 Dr. Phua Yee Hoong MD, FRCGS MD, FRCR	 Dr. Raymond Seng Dermatologist

Press Launch @ A*STAR Auditorium

Collaborated with A*STAR on the validation of the efficacy of Edible Bird's Nest Extract in a new compound.

- Found **7 scientific discoveries** in our EBN extract in G'NEST complex, which is a **world's first feat**.
- Proving – our Edible Bird Nest quality and its Extract is **more potent** than traditional bird's nest. (in the market, depends on the type of birds, the shape and color of the bird's nest.)

FEGO's Flagship Smart Immuno-Supplement

FEGO Biotech has sufficient expertise in the evidence-based formulation of niche natural products in the immuno-wellness industry.

FEGO Biotech launched its premium flagship “signature” supplement, **G'NEST**, in April 2018.

www.gnest.life

G'NEST is a proprietary synergistic formulation that regulates and balances the body's natural immune system to improve the overall immune wellness inside our body.

A*STAR Validated Efficacy Of G'NEST Immuno Supplement

7 Discoveries - Bioactive Molecules

7 Scientific Discoveries

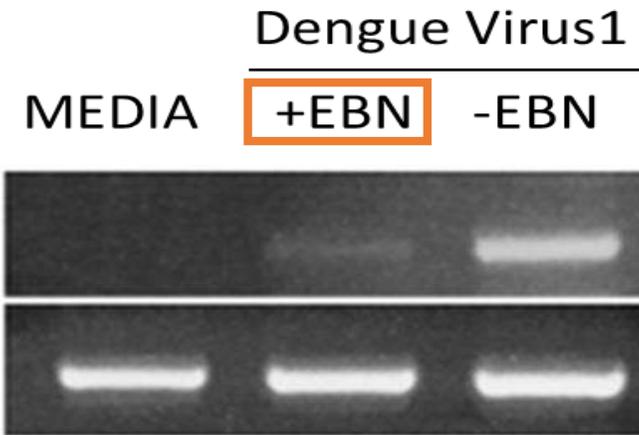

Scientific Discovery #1

Enhance
Immunity
Against
Infections

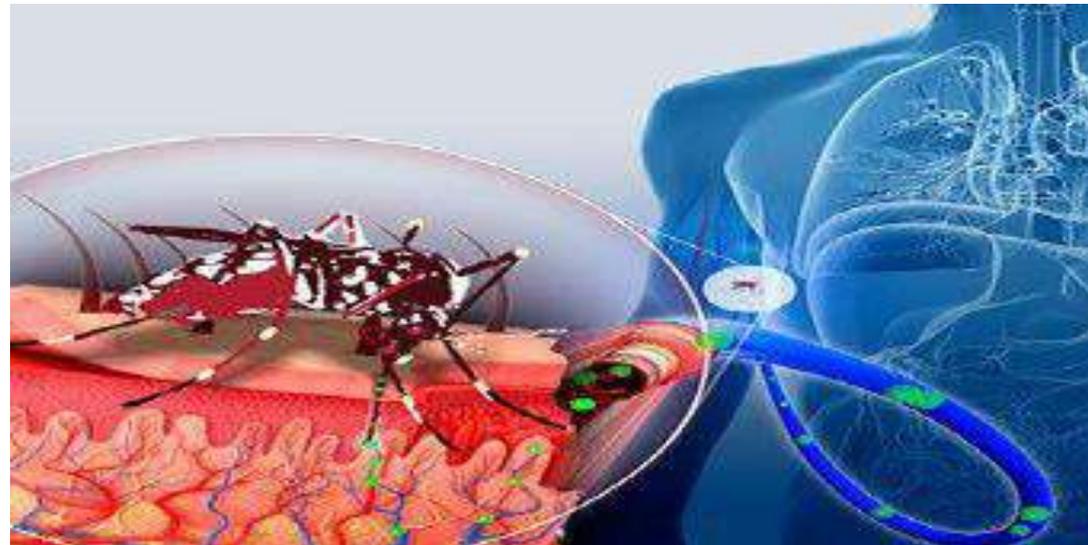

Dengue Virus1
negative strand RNA

GAPDH

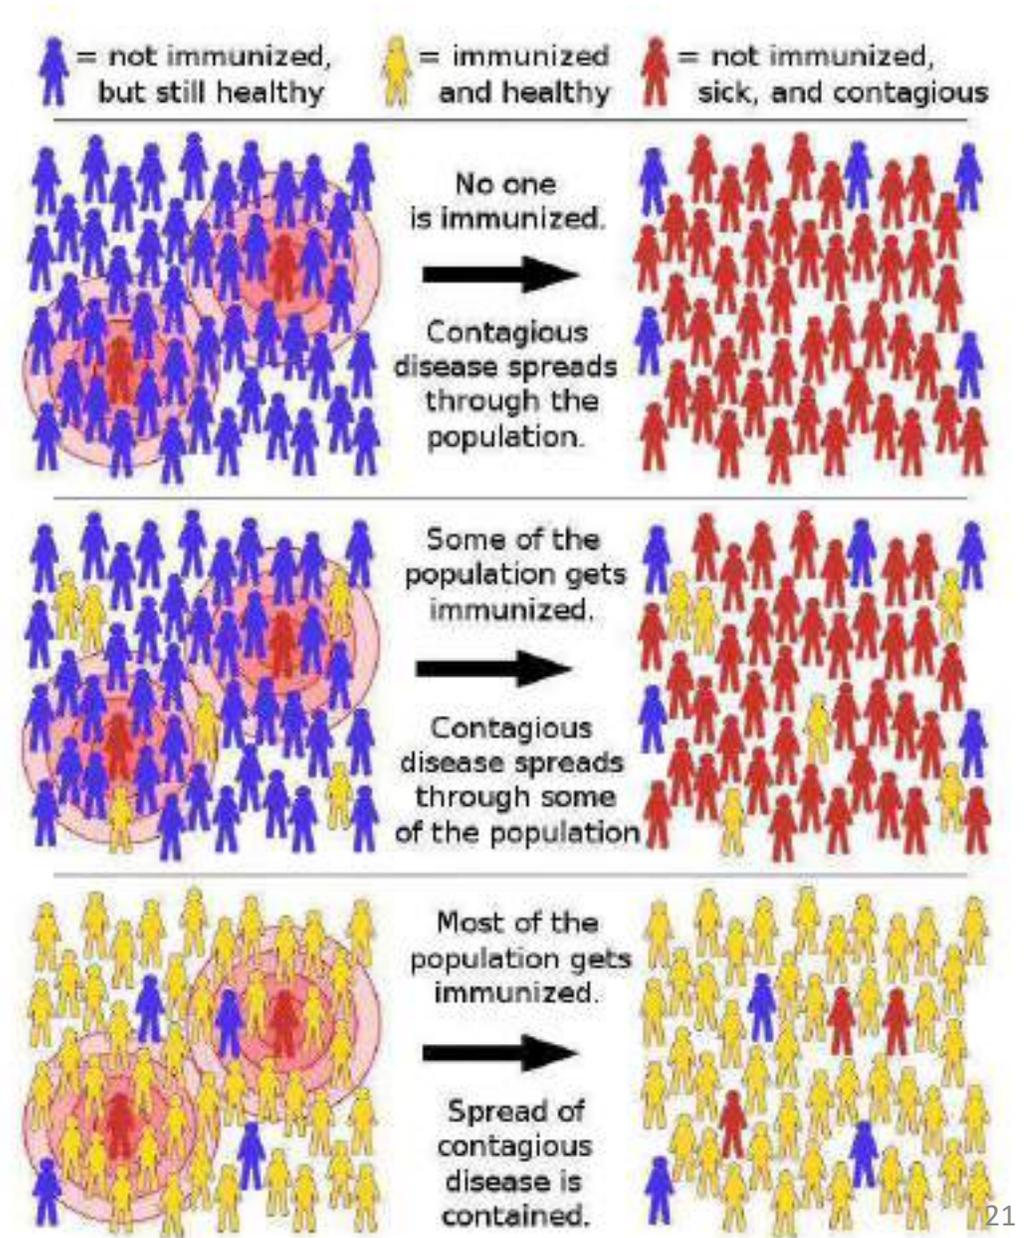

FEGO Biotech's Proprietary EBN Extract (E1) is able to inhibit dengue virus replication upon direct application to macrophages (immune cells inside human beings) cell culture.

Restrict dengue virus replication; tested on macrophages cells.

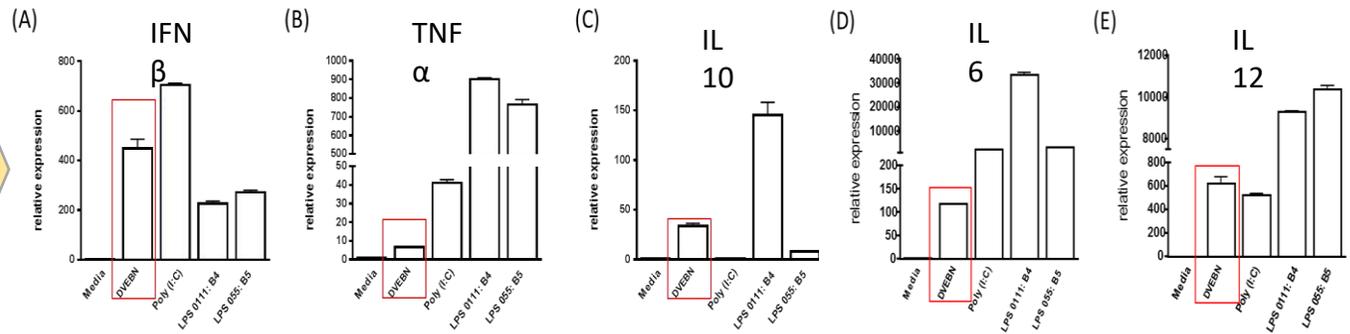

Effects On Covid-19 Virus? New Virus In Mankind History

If we notice a small population carefully, there would still be individuals who are not immunized but still remain healthy even when infected with a powerful virus. This is because they have what we call a strong first line of immunity or 'infantry soldiers' to fend off against any invading 'enemies'. This is crucial to the individuals' survival as it means delaying and reducing the damage caused by invading viruses before they could become more widespread in the body. The body will have more survival time to develop its second line of immunity or the development of antibodies to recover, as the body would usually take a much longer time to do so especially if the virus is a new and unknown one. For this therefore the first line of immunity represented by macrophages in our body would be extremely important. Macrophages are not specific for any virus and would 'swallow' any invading viruses or microbes at first sight. Therefore the big enough population of activated macrophages will be crucial in the first battle with any virus in our bodies. The population of macrophages as part of our first line immunity must be activated and mobilized soonest to have a great chance of winning this first battle, otherwise the individuals' survival subsequently might be at greater risk.

Scientific Discovery #2

Better Management of Chronic Diseases

FEGO Biotech's Proprietary EBN Extracts (E2) can elicit production of IFN- β and other pro & anti-inflammatory cytokines upon direct application to macrophages cell cultures.

Cytokines are immunomodulating molecules that stimulate the movement of "fighter" cells towards sites of inflammation, infection and trauma. Enable us to cope better with chronic diseases

e.g. diabetes, arthritis, multiple sclerosis, etc.

Scientific Discovery #3

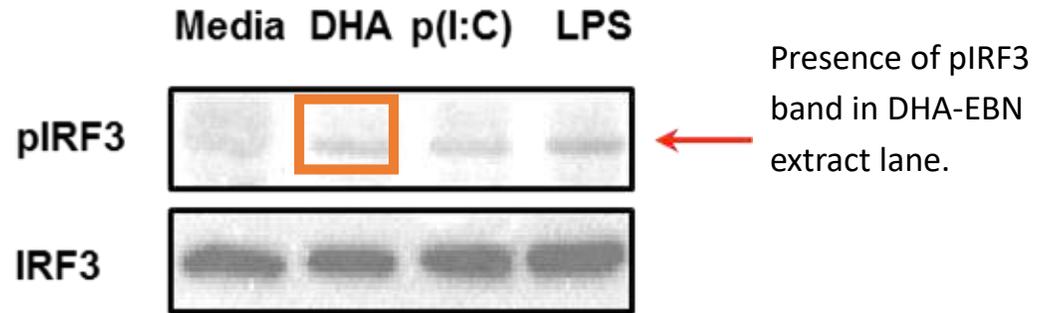

FEGO Biotech's Proprietary EBN Extracts (E3) can induce phosphorylation of IRF3 in Macrophages

Proven anti-viral effects and produces inflammatory cytokines in macrophages.

Enhanced effects preventing microbial infections; therefore better management of cancers.

Western blot analysis of EBN-induced macrophages

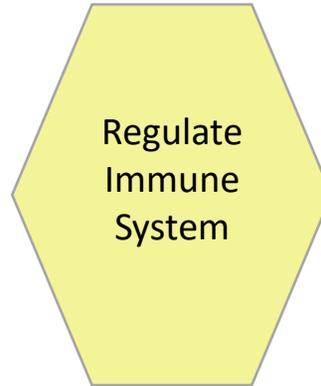

When properly modulated, the activated IRF3 has strong enhancing anti-cancer and viral prevention properties

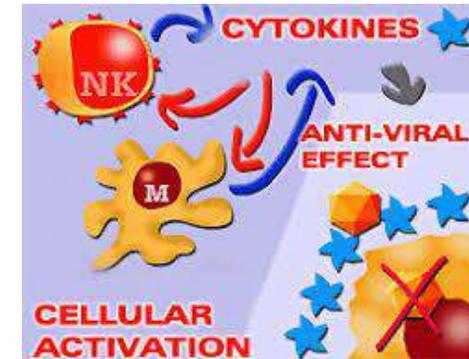

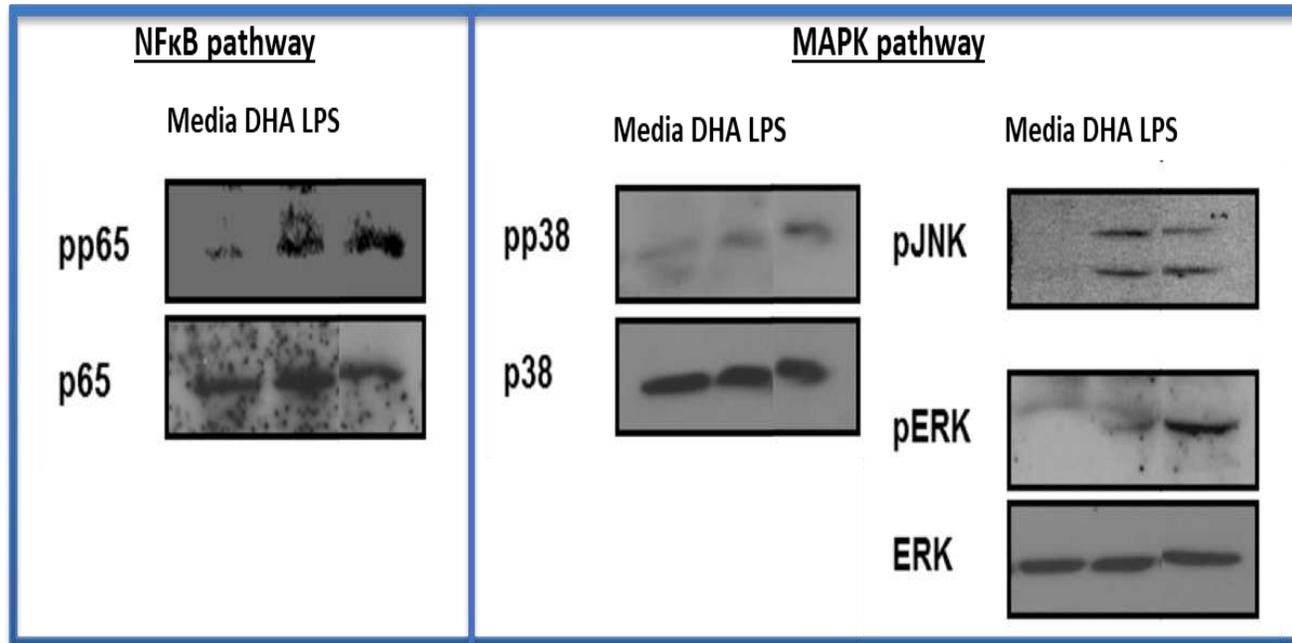

Scientific Discovery #4

FEGO Biotech's Proprietary EBN Extracts (E4) could induce activation of NFκB and MAPK pathways

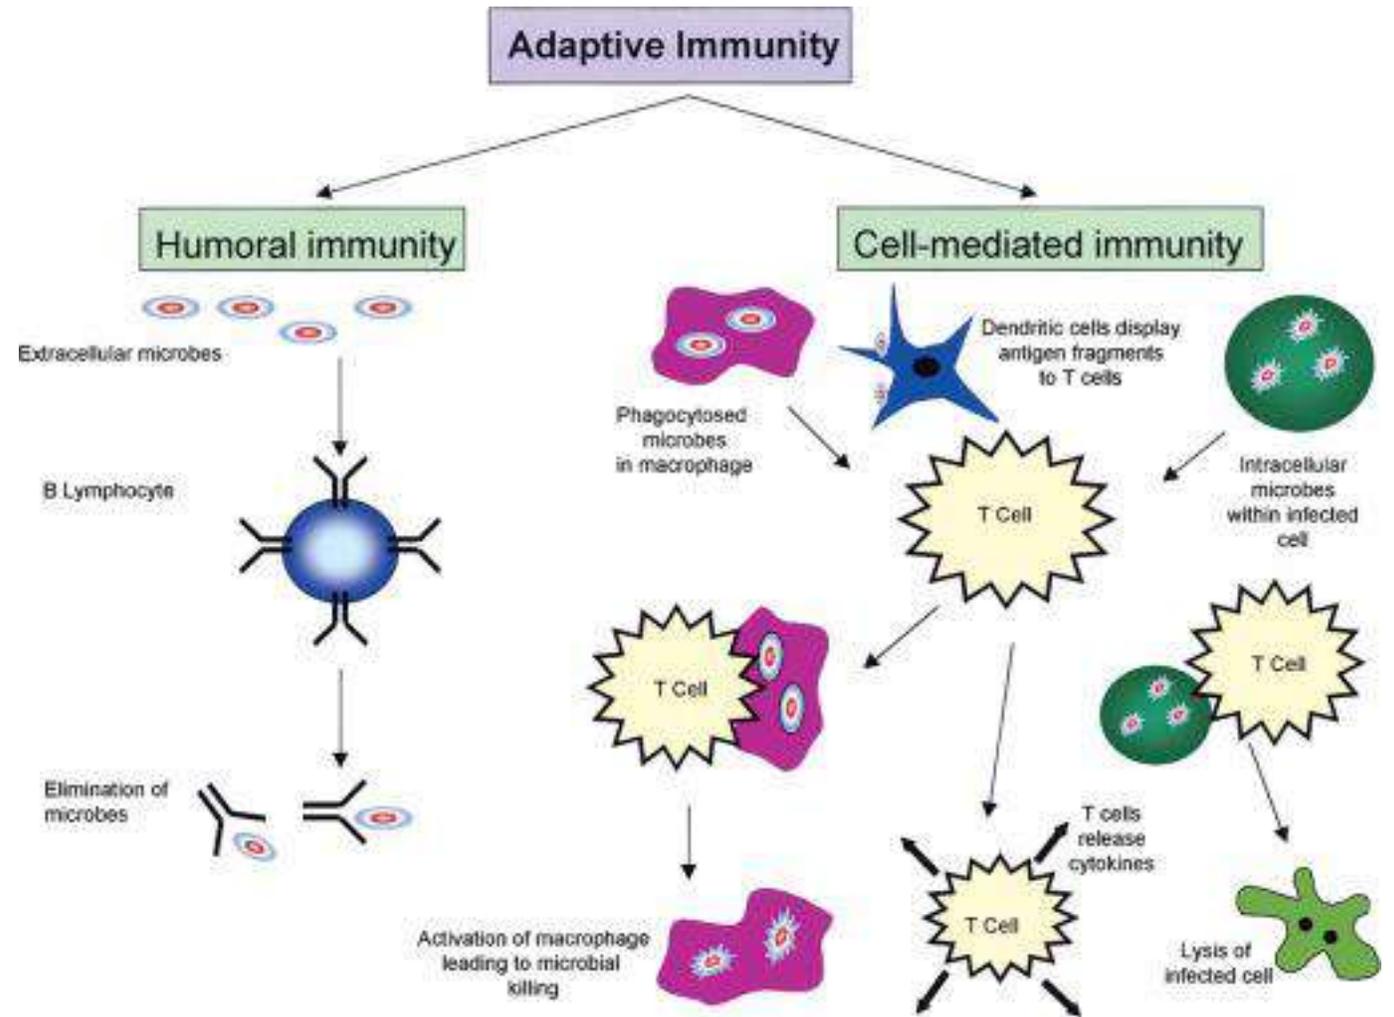

- ✓ By inducing NF-κB pathways, NF-κB regulates immune responses to cancers, inflammatory viral infections and autoimmune diseases.
- ✓ By inducing MAPK pathways, MAPKs directs proper cellular responses to disturbing stimuli such as pro-inflammatory cytokines to maintain cells survival.

Western blot analysis of EBN-induced macrophages

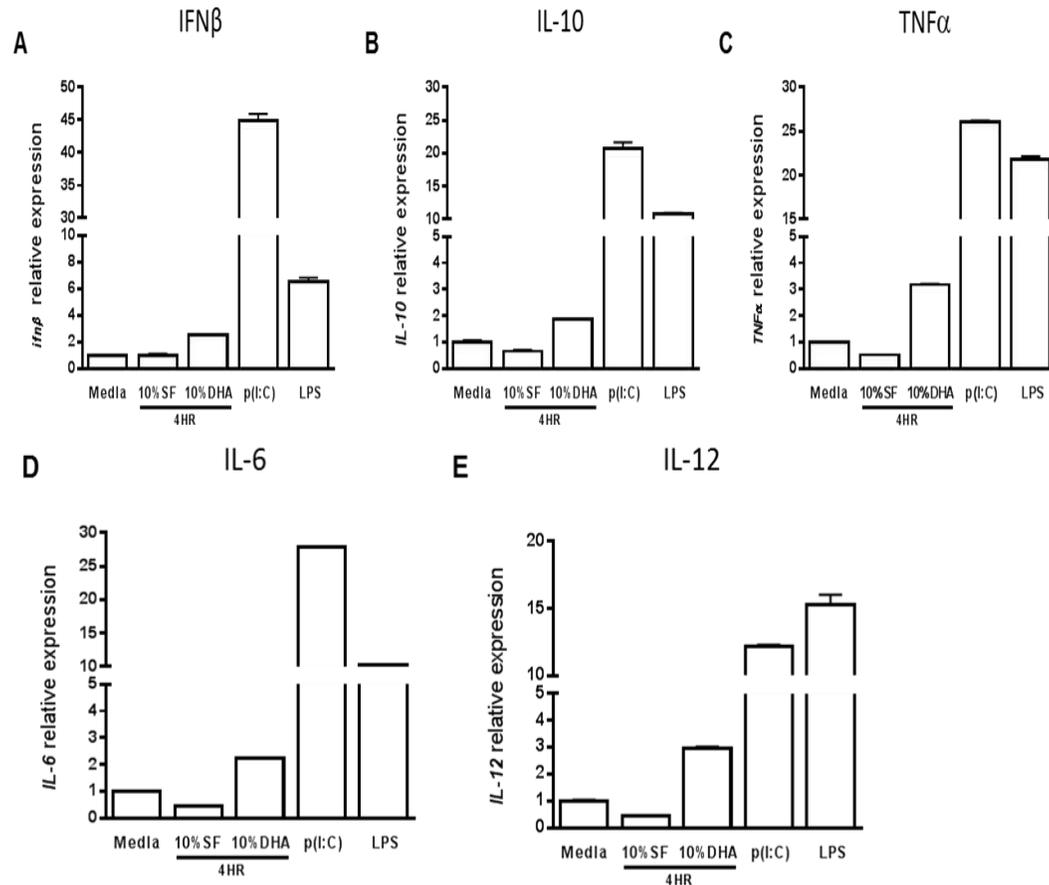

The full recovery from the new corona virus attack will need the coordinated response from macrophages, B cells and T cells as could be learnt from the attached weblink. Our **G'NEST** contains at least 3 different extracts that could **activate and mobilize precisely macrophages, T Cells and B Cells of our bodies, helping us to launch a well balanced immune response** to its infection in the most optimal and harmonious manner without injuring other normal cells too excessively and making us less sick than expected if infected.

Proven scientifically, our **G'NEST** would be a most ideal protector and guardian angel for you and your family in this uncertain crisis. The scientific data shown here is proprietary to our group and is copy righted. The data is generated from our proprietary extracted that were tested against macrophages and B Cells. The various cytokines and interleukins secreted by activated macrophages and B Cells due to our proprietary extracts are all well known molecules important in T cell activation too.

Scientific Discovery #5

FEGO Biotech's Proprietary EBN Extracts (E5) could induce the production of cytokines in B lymphocytes cell cultures.

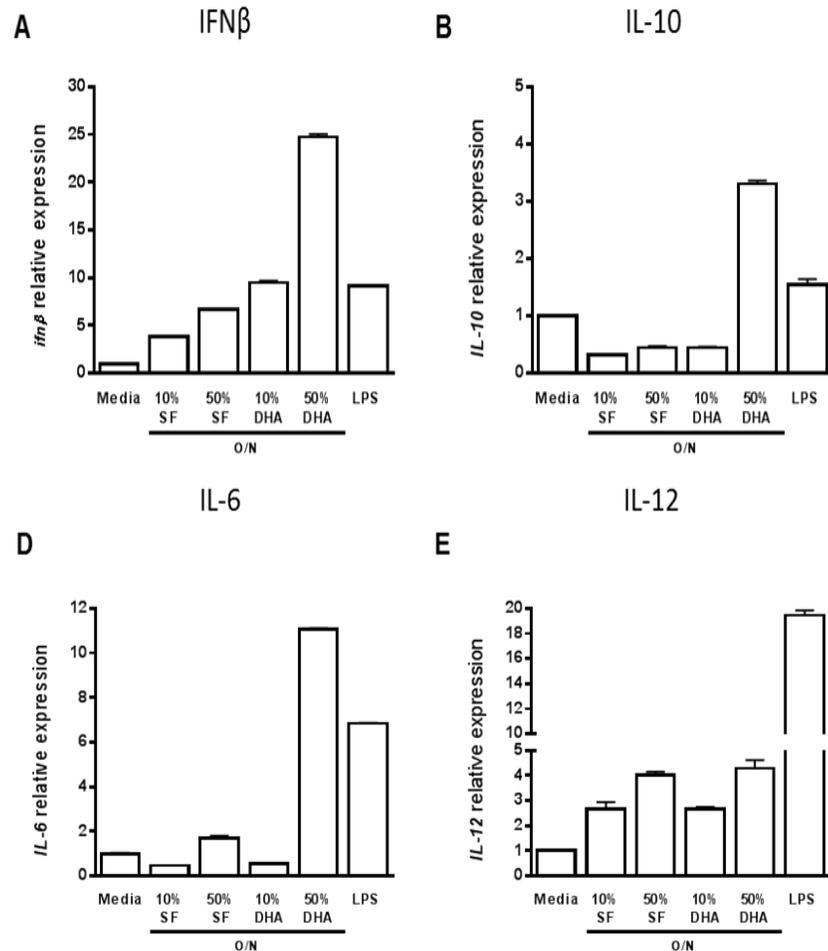

Better Management of Cancers and Influenza

B-lymphocytes cells circulate inside our blood stream and the lymph and will create specific antibodies against specific foreign antigens. Enhanced anti-cancer and viral prevention, better management of breast cancers and deadly flu or influenza.

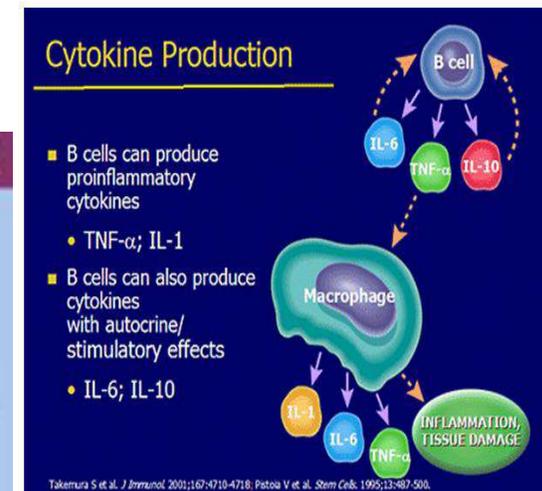

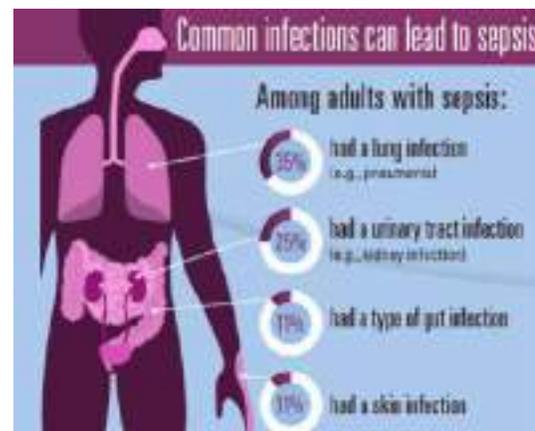

Scientific Discovery #6

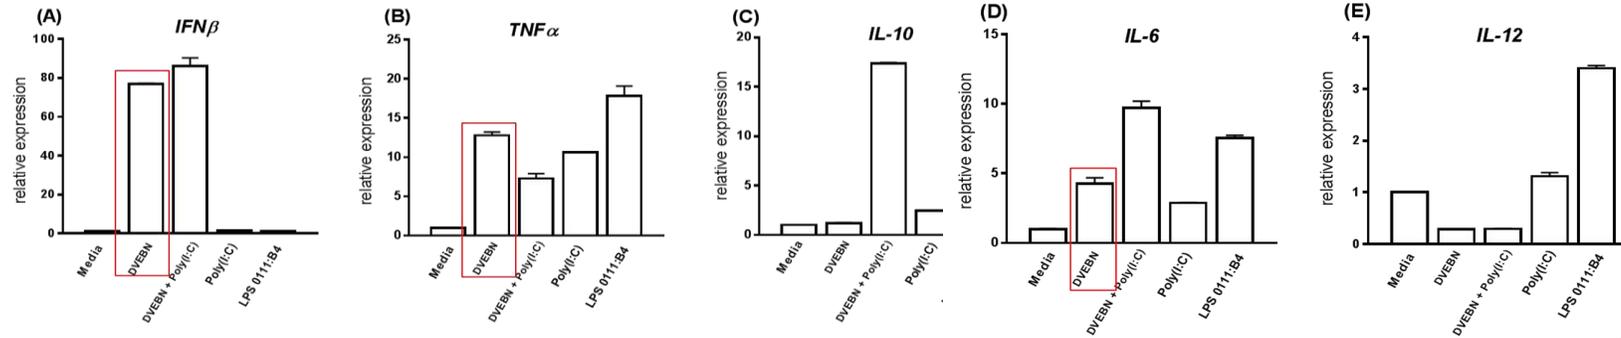

Sustainable
B-Cell
Cytokine
Production

FEGO Biotech's Proprietary EBN Extracts (E6) could have a dose-dependent effects on cytokines production of B cells

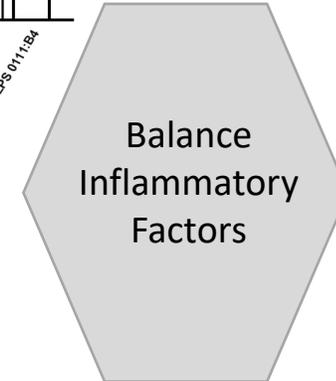

Regulate immune responses to reduce cancer related infections, inflammatory and autoimmune diseases, septic shock, viral infection, and even improper immune development.

Scientific Discovery #7

FEGO Biotech's Proprietary EBN Extracts (E7) could induce $IFN\beta$, $TNF\alpha$ and IL- 6 expression in B cells, to perform self-balancing of the pro-inflammatory and anti-inflammatory factors thereby inducing a balance immune modulating platform.

When there is a balanced immune modulating platform, symptoms such as loss of weight, muscle atrophy, fatigue, weakness, significant loss of appetite, bone loss or even *neurodegeneration* would be alleviated. Cancer would be less likely to occur because of a healthy balanced immune system.

Proinflammatory mediators

Antiinflammatory mediators

Summary Of World's First 7 Scientific Discoveries of Our EBN Extract

7 Scientific Discoveries

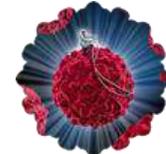

Enhance Immunity Against Infection

Restrict dengue viruses replication upon direct application to macrophages cell (immune cells in human beings).

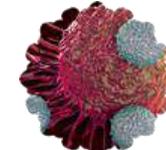

Better Management Of Acute Diseases

This discovery as an immunological concentrate could induce macrophages to produce titrated cytokines in culture.

Enhance Prevention Of Infection And Cancer

Cytokines are “immuno-modulating” molecules that balance and regulates our immune system responses in our body.

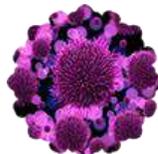

Sustainable B-cell Cytokine Production

This discovery as an immunological concentrate could have a dose-dependent effects on B-cells for cytokine production, including sustainable and prolonged effects.

Better Management Of Cancer And Influenza

The immunological concentrate could induce phosphorylation which activates IRF3 to enhance anti-cancers and anti-viral suppression properties.

Regulate Immune System

The compound could induce NF- κ B immune regulating pathway plays a key role in regulating the immune response against infection, reducing the chance of acute infection attacks or on the contrary, cytokine storms.

Balance Inflammatory Factors

As an immunological formulation, this concentrate balances the expression of pro-inflammatory and anti-inflammatory molecules in the body, and titrates the number of inflammatory cells, thus reducing immune over-reactions as well immune under-reactions.

ELEVATE YOUR IMMUNITY WITH PREMIUM BIRD'S NEST EXTRACTS

G'NEST is a revolutionary immuno-health supplement that regulates your body immune system. Made with a natural compound, it is conveniently taken in a soft-capsule form. G'NEST promotes overall wellness.

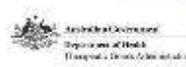

作为一种传统奢华营养保健品，燕窝因其是身贵的体现，精英阶层G'NEST致力于重新定义燕窝消费，让其食用更加方便快捷安全，功效更加显著，主要调节免疫系统的平衡。

The central image shows a dark blue box of G'NEST with a gold floral logo. Below the box are two yellow soft capsules. Five gold circular callouts surround the box, each containing a benefit:

- Top-class first-line immunity
- Essentially crafted with premium bird's nest extracts
- Non-irritably soothes at its natural best
- Most intuitively inherent immunity
- Magnified shield against health challenges

At the bottom of the box, the Chinese text "G'NEST 精燕阁" is visible. Below the box, a small banner reads "Order New With PROMO CODE SQKF".

Our Immune Defence System Against Viral Infections Such As Covid-19

WE ARE YOUR IMMUNITY
Immuno-Organic Health Supplement
Validated In Singapore

G'NEST is a scientifically advanced organic compound that carefully regulates and balances immune system in our body.

Accreditations: [Logos of various health and safety organizations]

Enhance Immunity Against Infections (World's First)
7 Scientific Discoveries

- Better Management of Chronic Diseases
- Enhance Prevention of Infections and Cancer
- Sustainable B-Cell Cytokine Production
- Balance Inflammatory Factors
- Regulate Immune System
- Better Management of Cancers and Influenza

Proprietary Natural Compound Formulation: Proprietary Protein, Seed, Fruit Extracts, Flavonoid, Oleo, Storage Oil, DNA, Cell, Natural, etc. (Research and Clinical Studies, Immunity, Regulating, Gene, Stem)

No artificial flavorings, colorings, preservatives, sugar and salt added.
Recommended intake: 1-2 capsules per day, 15 minutes before food.

WHAT IS RNA DIAGNOSTIC?

Our **proprietary non-invasive RNA test** provides instant RNA sample collection services, identifies consumer-level genetic data and personalized health services.

Disease is usually caused by one of these 4 factors:

- Changes in the DNA or gene sequence or gene mutation resulting in abnormal proteins being formed, leading to abnormal functions.
- Changes in the DNA or gene copies giving rise to abnormal levels of the normal proteins, which could also lead to abnormal functions.
- Translocation of the entire genes to other locations leading to either abnormal production or expression levels of the normal proteins, leading to abnormal functions.
- Epigenetic switching on and off of genes due to environmental, diet, stress and other non-genetic factors leading to abnormal levels of proteins and therefore disease.

Prevention is better than cure

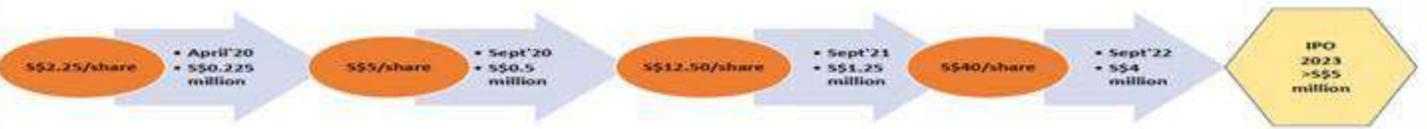

- Much precious genetic data on your body condition
- Significantly more predictive than DNA tests commonly found in the market
- Real time indicators of your current pseudo wellness status

Result to be verified by credible third party lab under government hospital group

Disclaimer: The RNA test results are just an indication of your current health situations. It is not intended to be used by the customer for any diagnostic purpose and are not a substitute for professional medical advice. You should always seek the advice of your physician or other health care provider with any questions you may have regarding diagnosis, cure, treatment, mitigation, or prevention of any disease or other medical condition or impairment or the status of your health.

Disease Origin And Early Detection Of 4 Factors

Disease is a reaction of organisms to, and/or a failure to cope with, one or more unbalancing changes in their internal environments

Diseases are usually caused by one of these factors or combination of these factors

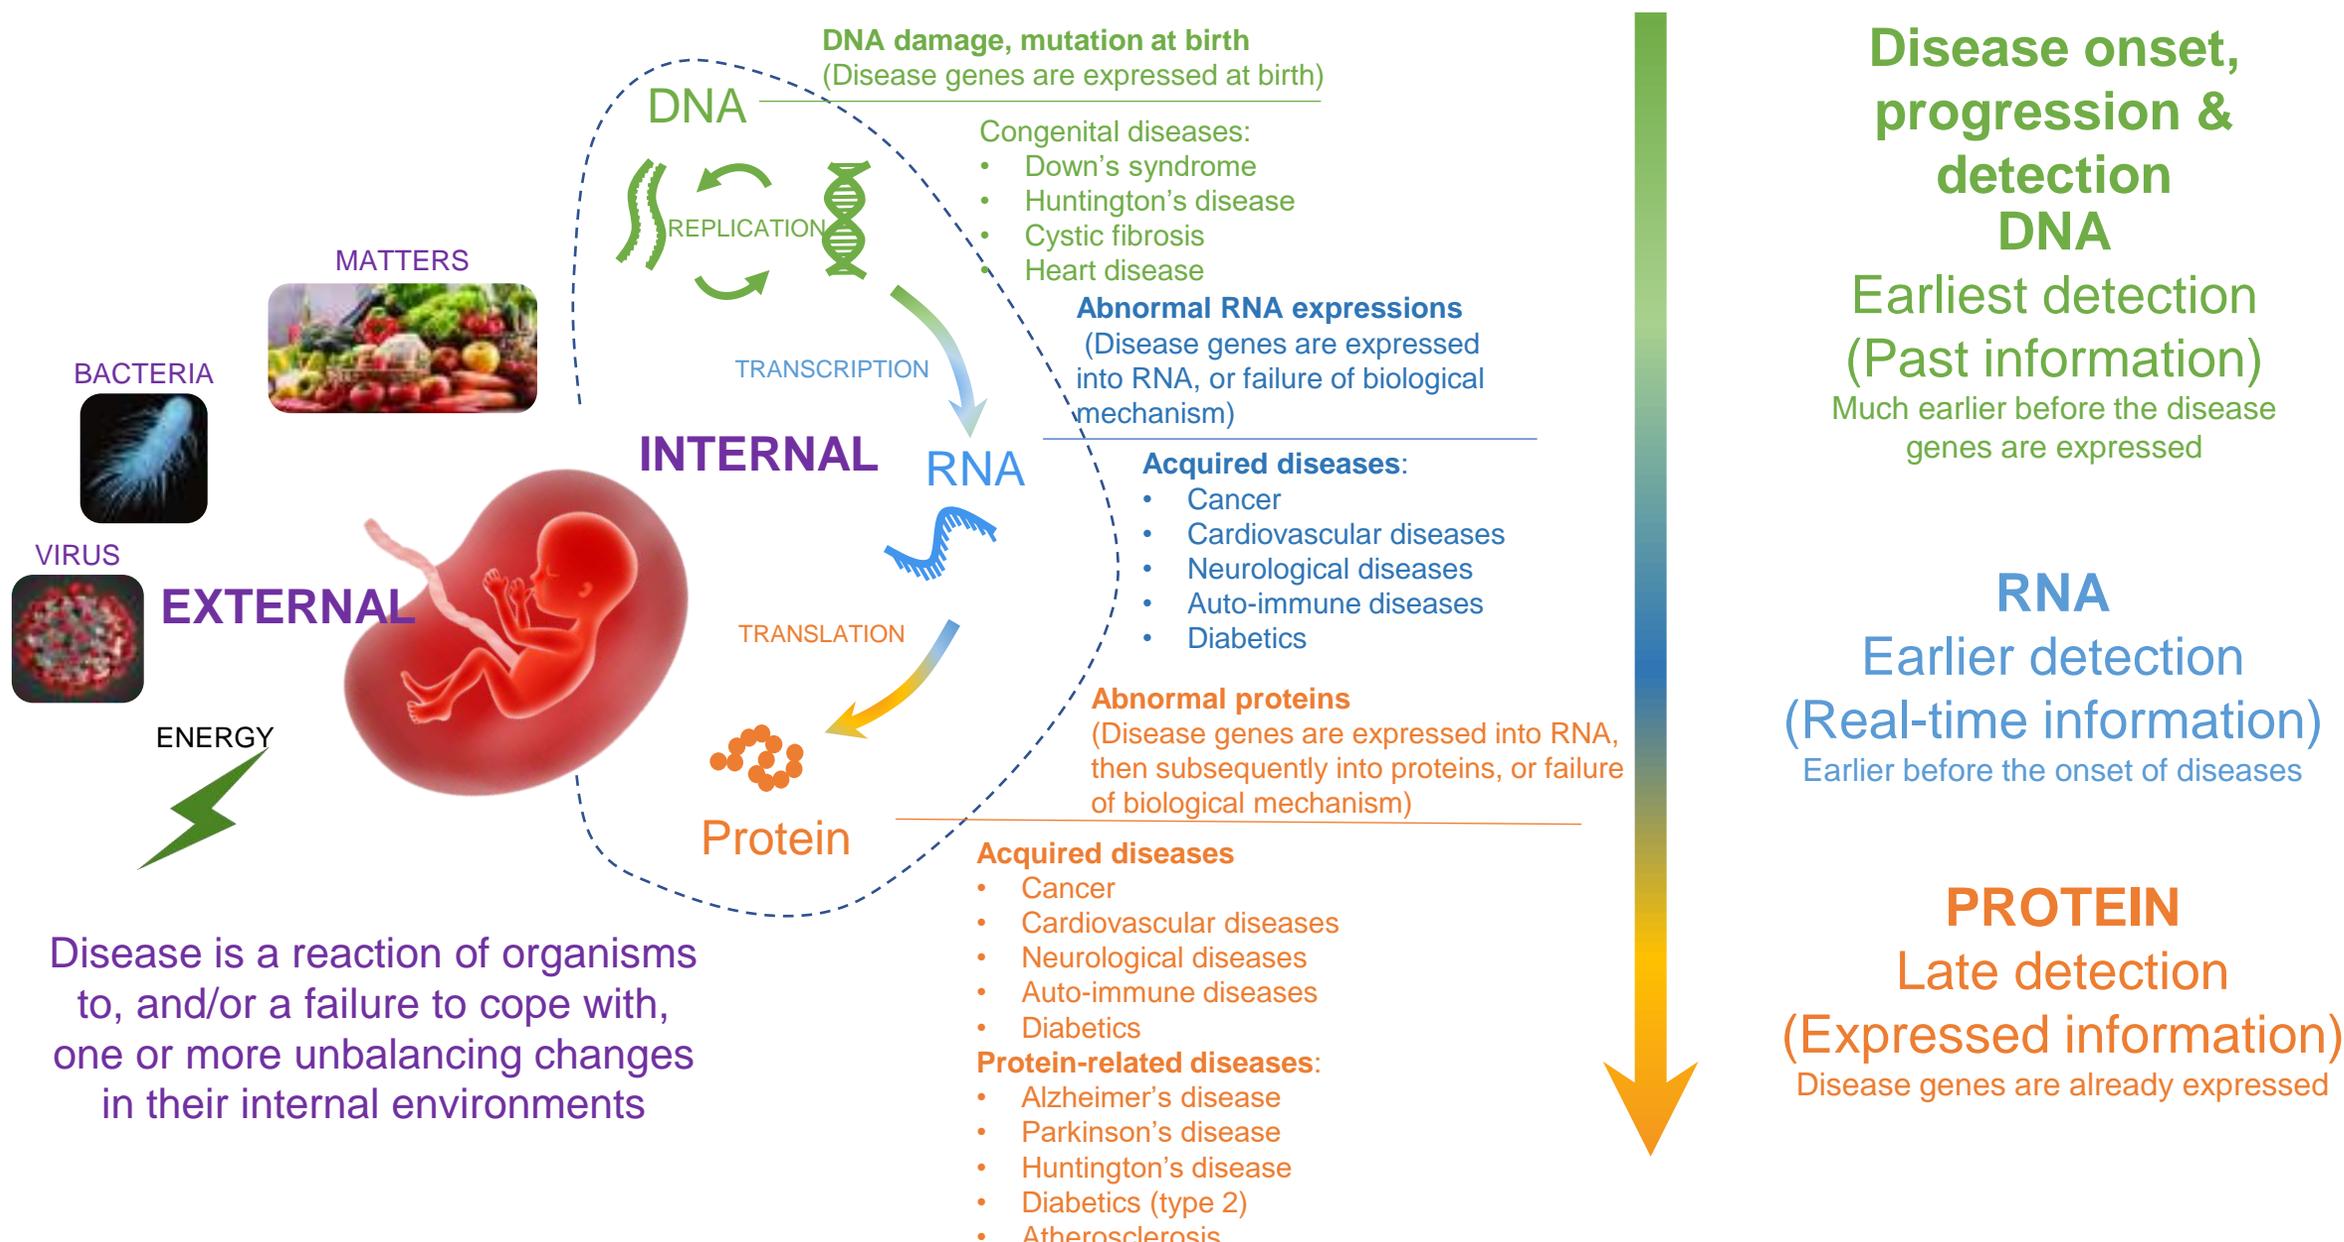

1. **Changes in the DNA or gene sequence or gene mutation** resulting in abnormal proteins being formed, leading to abnormal functions.

2. **Changes in the DNA or gene copies** giving rise to abnormal levels of the normal proteins, which could also lead to abnormal functions.

3. **Translocation of the entire genes to other locations**, leading to either abnormal production or expression levels of the normal proteins, leading to abnormal functions.

4. **Epigenetic switching on and switch off genes** due to environmental, diet, stress and other non-genetic factors, leading to abnormal levels of proteins and therefore functions.

RNA Is Real-time Detection Of Poor Health Condition

Disease is a reaction of organisms to, and/or a failure to cope with, one or more unbalancing changes in their internal environments

Key Milestones Planning As Reference Only

1. Q2 2018 (SGD 0.55M)

- Press release
- Acquired IP (Apr 2020 expected)

done

3. Q3 2019 (SGD 10M valuation)

- Collaboration with Chinese Government & JV companies
- SIA advertisement
- Assess to 7 Biosimilars (A*STAR)

done

5. Q2 2020 (SGD 50M valuation – milestones)

- India Launch of Humira Clinical Phase 1 **doing**
- Exploration to China, Vietnam and Indonesia launches for Humira
- 2nd Biosimilar Herceptin work in preparation for clinical trials **delay**

delay

7. Q4 2020 (SGD 250M valuation- milestones)

- CAR-T preclinical trials to start
- Humira clinical trial phase 3
- Herceptin and Rituximab - clinical trials phase 1
- G'Nest # 2 new markets

Likely to be on plan

9. Q1 2023 (SGD 2.5 Bn valuation – milestones) - Plan

- CAR-T to enter clinical trial phase 3
- Humira, Rituximab and Herceptin ready for global approved sales (Q3/Q4 2022)

2. Q1 2019 (SGD 5M valuation)

- A*STAR Biosimilars partnerships
- NUS partnership for bio-absorption capabilities

done

4. Q1 2020 (SGD 25M valuation)

- Humira Biosimilar clinical trials Q3 (India)
- G'Nest #2 formulation
- Credible management and advisory board

done

6. Q3 2020 (SGD 75M valuation- milestones)

- 2nd Biosimilar Herceptin and 3rd Biosimilar Rituximab to be introduced and work on preparation for clinical trials

Likely to be on plan

8. Q1 2022 (SGD 1.4 Bn valuation – milestones)

- Explosive Banking of Cytokine Data.
- Big Cytokine Data Analytics
- CAR-T to enter clinical trial phase 1
- Herceptin and Rituximab - clinical trials phase 3
